

TRANSFORM YOUR MENU INTO AN EXPERIENCE

THE SECRET SERVER
UK & EUROPE

PATENTED TECHNOLOGY FOR FORWARD-THINKING HOSPITALITY OPERATORS

THE PROBLEM WE SOLVE: TRADITIONAL MENUS ARE LEAVING MONEY ON THE TABLE

THESE SILENT REVENUE KILLERS DRAIN PROFIT POTENTIAL:

Low Consumer Engagement

Guests skim menus, order the usual and never truly connect with your brand.

Awareness Gaps

Potential customers scroll past your offerings, unaware of what stands out.

Inefficient Internal Training

Staff struggle to memorise allergens, ingredients and techniques — so errors are made.

Revenue Plateaus

Food and beverage sales hit a ceiling because guests aren't inspired to explore.

Negative Perceptions

Shifting the negative narrative held by consumers and operators around QR codes.

£55M

The UK hospitality sector alone loses an estimated **£55 million every year** on inefficient staff training — around **2.8 million working hours** — with training costs up roughly **70% over the past decade**.

WHY ACT QUICKLY? THE FOMO IS REAL

THE FIRST OPERATORS IN EACH MARKET TO ADOPT THIS TECHNOLOGY WILL IMMEDIATELY STAND OUT

Patented Technology

This is the first and only augmented reality menu system of its kind. No one else offers this level of immersion, depth and dual-purpose functionality.

Market Exclusivity Window

Right now, you can be the ONLY venue in your area offering this experience. Guests will specifically choose you because of this differentiation.

The Cost of Waiting

If your competitor moves first, you'll be explaining why your menu still looks flat while theirs feels alive. Experience is everything.

⚠ Free demo spots are going fast! Delay means watching others reap the rewards while you play catch-up.

BEING LATE TO THIS WON'T JUST FEEL OUTDATED — IT WILL BE OBVIOUS TO YOUR GUESTS

Give your guests an unforgettable experience. Give your team the tools to sell smarter.

The future of dining is here. Don't let your competitors claim it first.
