

Pitch Perfect

OPEN THE CONVO, CLOSE THE DEAL — UK & EUROPEAN EDITION

Localised, anglicised sales scripts. Speak each line naturally.

60-SECOND PITCH

QUICK OPEN

Tired of guests glazing over your menu and servers who can't confidently sell your best items? We fix both with one powerful tool.

Scan a simple QR code and your menu comes alive in patented 3D Augmented Reality. Guests watch your steak sizzle, cocktails pour, and desserts appear in true-to-size 3D right on their table. They get excited, understand portions, and order more premium items.

The same technology quietly trains your staff in the back — new hires scan and instantly learn ingredients, stories, allergens, and upsells.

No more expensive photo shoots or outdated printed menus. We have packages from a Starter demo to full Enterprise white-label solutions with GDPR-compliant analytics and multi-location support.

Venues using The Secret Server see higher average spend, faster training, and a memorable, modern experience.

Ready to make your menu your best salesperson? Let's book a quick 3D AR demo.

90-SECOND PITCH

THE STORY

Tired of customers glazing over your menu... and servers who can't confidently sell your best dishes and drinks?

Imagine this: a single QR code on your menu that turns every menu into a captivating 3D Augmented Reality experience. Guests point their phone and watch your signature steak sizzle in 3D, your cocktails sparkle with animated pours, and your desserts come alive — right on their table. They're engaged, excited, and far more likely to order premium items.

But here's the real game-changer: the same patented 3D AR technology also trains your staff. New hires scan the menu in the back and instantly learn every ingredient, story, allergen, and upsell cue — turning rookies into confident menu experts overnight. No more expensive photo shoots, printed menus that go stale, or inconsistent service.

We've built packages from quick Starter demos to full Enterprise white-label platforms with GDPR-compliant analytics, animations, multi-location support, and even custom training modules.

Venues using The Secret Server see higher average spend, faster training, stronger guest engagement, and a modern, memorable brand experience.

Ready to make your menu the most powerful salesperson in the room? Let's schedule a free 3D AR demo for you.

WE'RE HERE TO SUPPORT YOU!

Let me ask you — how often do guests look at your menu and just... glaze over? And how much money are you losing because your servers don't know how to talk about or upsell your signature dishes?

We created a patented 3D Augmented Reality platform that solves both problems at once.

Here's how it works: place one QR code on your menu. Guests open their phone camera, scan it, and your entire menu transforms into an interactive 3D Augmented Reality experience. They can see your dishes in true-to-size 3D, rotate them, learn about the ingredients and potential allergens, watch animated pours on cocktails or plating on dishes, see exactly how big the steak is, zoom in on toppings — everything. It removes uncertainty and creates instant excitement.

The result? Guests stay engaged longer, understand your offerings better, and consistently order higher-value items.

But here's the secret: the exact same technology trains your staff. In the back of house, new hires or seasonal workers scan the menu and instantly learn every ingredient, allergen detail, chef's story, pairing suggestion, and upsell cue. What used to take weeks of training now happens in minutes. You reduce training costs and deliver consistent, confident service — and all engagement and training data is captured lawfully and transparently under UK and EU GDPR.

We offer flexible packages:

Starter – Demo with up to 10 assets, perfect to test

Essentials – Up to 25 assets with seamless QR / WebAR integration

Pro – Advanced animations, analytics, and multi-location

Enterprise – Unlimited assets, white-label platform, API, and custom training modules

We also create stunning 2D images from your menu descriptions, short video loops for social, and even on-site shoots or mixology / culinary development if needed.

Venues using The Secret Server report higher average spend, dramatically faster onboarding, lower menu reprint costs, and a standout, modern guest experience that competitors don't have.

This isn't just another QR menu — it's a silent salesperson and trainer that works 24/7 for you.

I'd love to show you a live 3D demo. Do you have 10–15 minutes, or should I send over our info sheet first?
