

Sales Pitch Scripts

UK & EUROPEAN MARKET EDITION

Speak each line naturally. The scripts below are localised for UK & European audiences, with anglicised language and GDPR-aware framing of our data features.

3-MINUTE PITCH

Picture this: a busy restaurant. The menu hits the table. The server greets the guests. A guest asks a question about the menu... and the server cannot answer. Not because they haven't been trained, but because the training was inadequate. Not engaging. Outdated. The result? Safe orders, missed upsells, and a perfectly ordinary experience.

Did you know the UK hospitality sector alone is estimated to lose around **£55 million every year** on inefficient staff training — roughly 2.8 million working hours — with training costs up about **70% over the past decade**? This is the high cost of low engagement. That's the problem we solve.

I'm Christie Lawler, Co-Founder and CEO of THE SECRET SERVER — and with over 30 years of experience in the hospitality industry, I know why this is necessary.

Our technology delivers patented 3D Augmented Reality systems that turn any item into a fully interactive and immersive experience.

No app to download! A smartphone unlocks this technology. Simply scan a QR code — and the products come to life.

Behind the scenes, our geo-tracked, GDPR-compliant data reporting tells you exactly what your customers are looking at — enabling a turnkey product-optimisation strategy, with all personal data handled in line with UK and EU GDPR.

But here's the real game changer: the exact same 3D AR experience instantly trains your staff.

Staff review items in seconds and become confident experts almost overnight — while, on the back end, our data reporting tells you who is training, where, when, and for how long (processed lawfully and transparently under GDPR).

This single platform slashes training time and costs — no more expensive photo shoots, printed manuals, or long onboarding sessions.

And the best part? This isn't just for restaurants. Our technology translates to any industry with tangible products that need in-depth staff training as well as powerful consumer engagement and brand awareness — retail, manufacturing, real estate, automotive, electronics, toys... you name it.

These are complete solutions: bespoke platforms with unlimited assets, API integrations, and multi-location support. You tell us what you need, and we build it — all the photorealistic 3D models, animations, and videos, faster, cheaper, and far more sustainable than traditional methods.

Built-in analytics show exactly which products get the most engagement — which leads to happier customers, higher check averages, dramatically lower training costs, and a modern competitive edge.

We're THE SECRET SERVER — and we're turning ordinary catalogues and menus into unforgettable experiences while saving a boatload of cash on training and consumer-awareness strategies.

Come find me to see a live demo, or to see the tech for yourself!

1-MINUTE PITCH

HOOK (10 SEC)

Imagine walking into any business where the product catalogue literally comes alive. Point your phone and suddenly you're seeing a 3D product rotate, watching it in action, and hearing the full story.

PROBLEM (10 SEC)

Traditional catalogues and menus are static and forgettable. Customers hesitate. Staff struggle with training and upselling. Opportunities slip away.

SOLUTION + TRAINING SAVINGS (20 SEC)

That's the magic of The Secret Server. Patented 3D Augmented Reality — scan one QR code, no app needed. Customers get immersive experiences while your staff uses the exact same assets for instant training. This slashes training time and costs by a ton.

SCALABILITY ACROSS INDUSTRIES (15 SEC)

And it works for any industry with tangible products that require in-depth training plus strong consumer engagement and brand awareness — restaurants, retail, manufacturing, real estate, automotive, and beyond.

RESULTS & CLOSE (10 SEC)

Captivated customers, empowered teams, boosted sales, and massive training savings. We're The Secret Server at thesecretserver.co. I'd love to show you how it works — come talk to me after!

Delivery Tip

These bullets are written exactly as you should speak them — just read each line naturally. The emphasis on saving money on training and cross-industry scalability is front-and-centre without losing the original flow.
